Purton
Swindon

January 2009

Milbrooke Construction took on our garage project in autumn 2008. We needed a replacement for the old leaking flat roof, and wanted a pitched roof with a storage space over the garage. The building also needed to be extended to allow us to fit cars in, the current space being too short.

Tony and Tim came up with a sound and practical design which suited our needs perfectly.

The work began very promptly, with Milbrooke solving some problems arising with the site quickly and effectively. The craftsmen carrying out the various aspects of the work were obviously very skilled and experienced, and finished the work to a standard exceeding our expectations, and within the time planned.

We are delighted with the result, and are enjoying using our new garage.

We would wholeheartedly recommend Milbrooke to anyone wanting a building design and construction project completed to a professional standard with no fuss or complications.

John & Brigitte Wilkinson
